

Posting Date: 16 April 2022

Job Type: Permanent

Discipline: Biotechnology, Vaccines, Antivirals

Location: Open

Benevira is seeking a Chief Medical Officer for our antiviral clinical development. The team is located in the United States, Europe and Israel. As the CMO, the individual will be responsible providing leadership, direction, vision, and with aptitude for execution, safety and excellence as the Benevira products enter clinical development. The CMO will be a key member of the Executive Leadership team with the responsibility for strategy, execution and success of Benevira's clinical development plans.

**Job Responsibilities:**

- A hands-on leader who will ensure that the global product R&D strategy complies with medical and regulatory requirements.
- Lead a talented team to execute on the therapeutic and prophylactic clinical development strategy.
- Work collaboratively with the R&D teams to ensure programs in the pipeline meet Target Product Profiles (TPP) necessary within the industry.
- Participate in business initiatives that further the strategic and business objectives of the company. Leading and presenting Benevira's clinical updates at conferences and symposiums to stay connected with the scientific, medical, and regulatory communities.
- Communicate program progress and challenges to senior management, regulatory agencies as appropriate.
- Develop and draft the company's IP portfolio for Benevira's clinical pipeline.
- Lead interaction and build trustful relationships with medical and scientific advisors, building and maintaining relationships consistent with commercial and development objectives.
- Work closely with Quality Assurance and Operations to secure that quality and clinical trial methodology comply with global regulatory requirements.
- Oversee third parties (i.e. CROs, consultants, etc) and internal teams to provide scientific and medical guidance

**Skills and Requirements:**

- Medical degree
- 10+ years of clinical experience with at least 3-5 years in a leadership role
- Extensive therapeutic experience in vaccine or antiviral clinical development
- Strategic and innovative thinking with IP creation experience
- Team player who can maintain professional relationships with internal colleagues and external collaborators
- Solid communicator with the ability to lead teams from remote locations
- International travel as needed, requirement up to individual in the role
- Ability to work in a fast-paced environment
